SKILLS

TECHNICAL

Languages:

JavaScript • HTML • CSS • C++

Technologies/Frameworks/
Libraries:

ReactJS • NodeJS • ExpressJS •
MongoDB • Tailwind CSS
• Bootstrap • MaterialUI • Figma •
Postman • Vercel • Netlify

Familiar:

NextJS • Java • C • MySQL

ACHIEVEMENTS /

ACTIVITIES

📄 Certificates

- Got 3rd among the batch of DSA Online Course by Coding Ninjas in 2021.
- Worked as **event manager** for our college annual fest in 2022.
- Got among top 2 teams in the training conducted by our college on MERN stack in Aug 2022.
- Came **Top 5** among 70 teams in 24-hour Hackathon with my team. Learned to work under pressure and adhere deadlines.

EXPERIENCE

🔗 EXAM BAZAAR | FRONTEND INTERN

April 2023 | Remote

- Worked With a team of UI/UX and Backend Intern to work on Blogging page of the website.
- Learned to work with a team and how to deliver product due deadline.
- Used **React JS** and **Tailwind CSS** for development and **MaterialUI** for components.

🔗 MEDISHIELD HEALTHCARE | BACKEND INTERN

May 2023 | Remote

- Utilized **MongoDB** to efficiently store and manage data.
- Using **Express JS** and **Node JS**, developed robust **APIs** that facilitated seamless communication between the frontend and backend.
- Leveraged **Postman** to test and validate the API endpoints, ensuring optimal functionality.

MOON LIGHT RESORT | UI/UX AND FRONT END FREELANCER

June 2023 - Ongoing | Remote

- Using **Figma**, I have created a prototype that captures the essence of the resort's brand and user experience.
- The development process involves **NextJS** and **Tailwind CSS**, ensuring a seamless and visually appealing web application for the resort's visitors.

PROJECTS

🔗 BLAWG 🌐 | React Js, Redux, MongoDB, NodeJs, ExpressJs

Dec 2022 | Solo Work

It is an Blogging website with all basic **CRUD** applications such as User authentication, blog writing , updation , deletion and reading others' blogs. The state management was done with **Redux toolkit** and various other libraries like **react-hot-toast** and **JWT token** (for user authentication) and **bcrypt** for password hashing was used. It was deployed on **Vercel**

🔗 CODE-ALONG 🌐 | ReactJs, NodeJs, ExpressJs, Socket.io

Oct 2022 | Solo Work

It is an interface where multiple users can join same room and can edit and see code in real time. It is best suited for online coding interviews. **Socket.io** was used to make realtime connections. **ReactJS** was used for frontend and **ExpressJS** for backend. Various external libraries such as **Avatar**, **uuid**(for making unique id) were also used and app was deployed on **Netlify**.

🔗 E-COMMERCE 🌐 | ReactJs, NodeJs, ExpressJs, MongoDB Atlas

Aug 2022 | Team of 4

Interface which will give look and feel of a e-commerce store with catalog of dynamically generated products which user can choose from. Both user and seller can perform **CRUD** operations over the products. For authorization **JWT** tokens were used and for encryption password hashing was achieved using **BYCRYPT**.
