Education

AES SR. SEC JanakPuri

CBSE X (93.12%) XII(94%)

April 2018-2020

New Delhi, India

Bharati Vidyapeeth's College of Engineering

Bachelor of Technology in Information Technology(CGPA of 9.349)

August 2020 - Ongoing

New Delhi, India

EXPERIENCE

Medishield Healthcare | Certificate

May 2023

Backend Intern

Remote Work

- I utilized **MongoDB** to efficiently store and manage data. Employing **Express JS** and **Node JS**, I developed robust **APIs** that facilitated seamless communication between the frontend and backend.
- I leveraged **Postman** to test and validate the API endpoints, ensuring optimal functionality.I successfully managed more than 10,000 API requests simultaneously, ensuring the backend system's **scalability and responsiveness**.

ExamBazaar | Certificate

April 2023

Front End Intern

Remote Work

- Worked With a team of UI/UX and Backend Intern to work on feature of the website. Learned to work with a team and how to deliver product due deadline.
- Used **React JS** and **Tailwind CSS** for development and **MaterialUI** for components.

Moon Light

June 2023 - Ongoing

UI/UX and Front End Freelancer

Remote Work

- Utilizing **Figma**, I have created a prototype that captures the essence of the resort's brand and user experience.
- The development process involves **NextJS** and **Tailwind CSS**, ensuring a seamless and visually appealing web application for the resort's visitors.

PROJECTS

BLAWG | React Js, Redux, MongoDB, NodeJs, ExpressJs | Live Link

4

- It is an Blogging website with all basic CRUD applications ranging from user **authentication** to **ExpressJS**.
- The state management was done with **Redux toolkit** and various other libraries like **react-hot-toast** and **JWT token** (for user authentication) and **bcrypt** for password hashing was used

CODE-ALONG | ReactJs, NodeJs, ExpressJs, Socket.io | Live Link

4

- It is an interface where multiple users can join same room and can edit and see code in real time. It is best suited for online coding interviews.
- **Socket.io** was used to make realtime connections. **ReactJS** was used for frontend and **ExpressJS** for backend. Various external libraries such as **Avatar**, **uuid**(for making unique id) were also used and app was deployed on heroku.

PORTFOLIO WEBSITE | ReactJs, TailwindCSS | Live Link

4

- You can find all my contact details and projects over here.

Technical Skills

Languages: C++, JavaScript, SQL, HTML/CSS

Technologies/Frameworks/Libraries: ExpressJS, MongoDb, NodeJS, Tailwind/Bootstrap/MaterialUI , ReactJS, PostMan, Figma
